### Performance Scenarios

This table shows how your investment could perform under different scenarios. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

**Recommended Holding Period: 3 years**

**Example Investment: EUR 10,000**

**Past performance may not be a reliable guide to future performance. The value of an investment can go down as well as up and return on your investment will therefore be variable. Income (yield) may fluctuate in accordance with market conditions and taxation arrangements. Bond prices are sensitive to changes in interest rates, and a rise in interest rates can cause a decline in their prices. Changes in exchange rates may have an adverse effect on the value price or income of the product, depending on an investor’s home currency.**
